

Percentage of high school students who engaged in sexual behaviors and had ever been tested for HIV, by type of grades earned (mostly A's, B's, C's, or D's/F's) — United States, National Youth Risk Behavior Survey, 2015

Sexual Behaviors and HIV Testing	Percentage of students who engaged in each risk behavior, by type of grades mostly earned in school†				Significant Association*
	A's	B's	C's	D's/F's	
Sexual Behaviors					
Ever had sexual intercourse	31	41	54	62	Yes
Had sexual intercourse before age 13 years (for the first time)	2	3	5	13	Yes
Had sexual intercourse with four or more persons (during their life)	6	11	17	26	Yes
Were currently sexually active (sexual intercourse with at least one person during the 3 months before the survey)	23	30	38	46	Yes
Drank alcohol or used drugs (before last sexual intercourse, among students who were currently sexually active)	14	18	24	41	Yes
Used a condom (during last sexual intercourse, among students who were currently sexually active)	61	58	54	41	Yes
Used birth control pills (before last sexual intercourse, among students who were currently sexually active)	21	20	16	13	No
Used an IUD (e.g. Mirena or ParaGard) or implant (e.g. Implanon or Nexplanon) (before last sexual intercourse to prevent pregnancy, among students who were currently sexually active)	3	4	4	4	No
Used a shot (e.g., Depo-Provera), patch (e.g. OrthoEvra), or birth control ring (e.g. Nuva Ring) (before last sexual intercourse to prevent pregnancy, among students who were currently sexually active)	6	5	6	5	No
Used birth control pills; an IUD or implant; or a shot, patch, or birth control ring (before last sexual intercourse to prevent pregnancy, among students who were currently sexually active)	30	29	26	22	No
Used both a condom and birth control pills; an IUD or implant; or a shot, patch, or birth control ring (to prevent STD and pregnancy, among students who were currently sexually active)	11	10	6	9	No
Did not use any method to prevent pregnancy (during last sexual intercourse, among students who were currently sexually active)	9	12	16	31	Yes
HIV Testing					
Were ever tested for HIV (not counting tests done when donating blood)	7	10	13	15	Yes

† Percentage of students who engaged in each risk behavior, by type of grades mostly earned in school are cell proportions from cross-tabulations and therefore do not add to 100%. Row proportions (not shown) add up to 100%.

*Based on logistic regression analysis controlling for sex, race/ethnicity, and grade in school, $p < 0.05$.
