

Demographics: Enrollment in Early Intervention (EI) (2017)

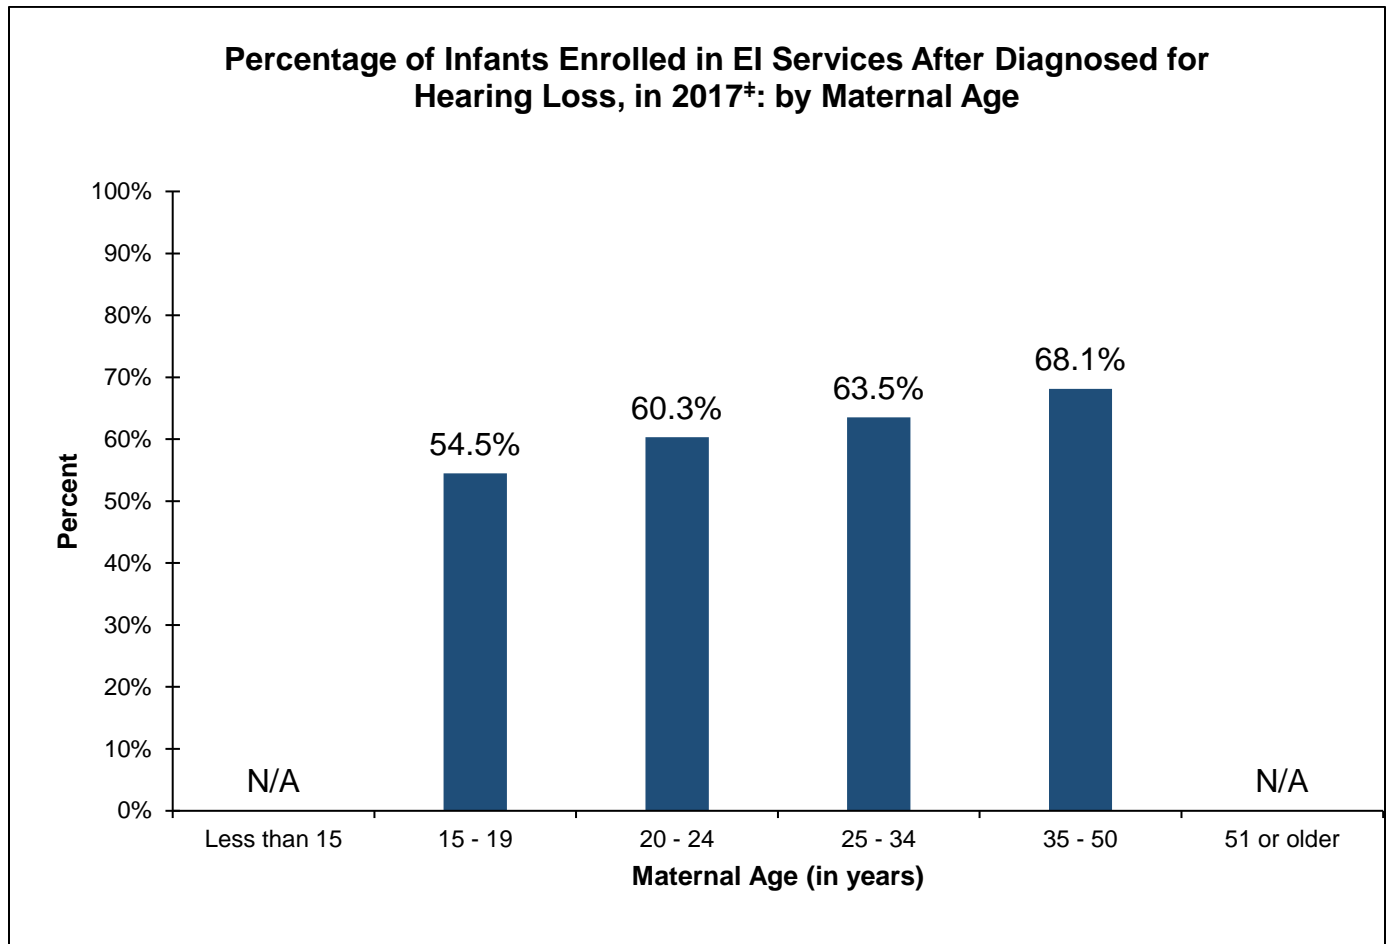

Source: 2017 CDC Hearing Screening and Follow-up Survey (HSFS)*

**Each jurisdiction's submitted data underwent a cleaning and error check process. Jurisdictions reporting $\geq 20\%$ of total infants receiving diagnostic testing in the "unknown" category, for each demographic variable, were excluded from this analysis.*

**Percentage of infants enrolled in Part C EI services for each category is calculated among the total number of infants with hearing loss (i.e. % Males Enrolled in Part C EI After Diagnosed with Hearing Loss = (# Total Enrolled in Part C EI: Male / # Total with Hearing Loss:Male) * 100). Test for significant difference between percentages was calculated using Pearson's chi-square test where $\alpha = 0.05$ (Software: SAS 9.4, Cary, NC).*
