

Percentages of persons aged 18-64 who were uninsured, had private health insurance coverage, and had public health plan coverage at the time of interview, by year and quarter: United States, January 2010–June 2013

Year and quarter (Q)	Uninsured ¹	Private health insurance coverage ²	Public health plan coverage ³
	Percent (standard error)		
2010 full year	22.3 (0.35)	64.1 (0.46)	15.0 (0.30)
Q1	21.5 (0.66)	65.5 (0.88)	14.4 (0.54)
Q2	23.2 (0.80)	64.0 (0.89)	14.0 (0.44)
Q3	23.0 (0.58)	63.2 (0.73)	15.0 (0.51)
Q4	21.4 (0.60)	63.6 (0.81)	16.4 (0.53)
2011 full year	21.3 (0.34)	64.2 (0.45)	15.9 (0.29)
Q1	21.6 (0.59)	64.0 (0.79)	15.9 (0.50)
Q2	21.2 (0.59)	64.5 (0.79)	15.6 (0.47)
Q3	21.3 (0.62)	64.2 (0.84)	15.9 (0.52)
Q4	21.0 (0.62)	64.3 (0.78)	16.2 (0.51)
2012 full year	20.9 (0.31)	64.1 (0.42)	16.4 (0.29)
Q1	21.7 (0.66)	63.6 (0.84)	16.0 (0.51)
Q2	19.6 (0.59)	65.9 (0.83)	16.0 (0.51)
Q3	20.9 (0.57)	63.5 (0.79)	17.0 (0.55)
Q4	21.3 (0.58)	63.3 (0.73)	16.8 (0.50)
2013 (January – June)	20.4 (0.46)	64.4 (0.58)	16.6 (0.39)
Q1	20.9 (0.64)	63.6 (0.79)	16.9 (0.54)
Q2	19.9 (0.58)	65.1 (0.74)	16.3 (0.51)

¹A person was defined as uninsured if he or she did not have any private health insurance, Medicare, Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. A person was also defined as uninsured if he or she had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

²Excludes plans that paid for only one type of service, such as accidents or dental care.

³Includes Medicaid, CHIP, state-sponsored or other government-sponsored health plan, Medicare (disability), and military plans.

NOTES: The estimates for 2013 are based on data collected from January through June. The 2013 health insurance estimates are based on preliminary files released prior to final data editing and final weighting, to provide access to the most recent information from the National Health Interview Survey. The resulting estimates for persons without health insurance are generally 0.1–0.3 percentage points lower than those based on the editing procedures used for the final data files. Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ by more than 0.3 percentage points from estimates based on final files. For comparison purposes, preliminary files were also used for the 2010–2012 estimates. Data are based on household interviews of a sample of the civilian noninstitutionalized population.
