Keywords: income, poverty

Notes: The family's value for this variable is assigned to each member of the family, thus making it a person-level variable. The "Undefinable" cases, coded as 9999, consist of families where the number of children under age 18 in the family is equivalent to the number of family members. Format of data has an implied decimal (xx.xx). Published poverty thresholds from the Census Bureau are used in these calculations.
 The POVRATI2 were calculated from the top-coded family income FAMINCI2.
